

# Services to match your every need

From spare parts and technical support to cloud-based condition monitoring and assistance solutions, ABB offers the most extensive service offering for drives to fit your needs. The global ABB service units, complemented by external authorized value providers, form a service network on your doorstep. Maximize performance, uptime and efficiency throughout the life cycle of your drive assets.

### **Service Agreements – ABB Drive Care**

Simplify your drive maintenance with the expertise of the equipment manufacturer. With ABB Drive Care agreement, you get the right service that matches your needs and budget.

### **Training**

Professional training enhances employee competence and motivation, improves site safety, productivity and reduces downtime. In addition to e-learning and hands-on courses at more than 20 ABB training centers globally, some of our courses can also be conducted at your facilities.

### **Installation & commissioning**

Proper installation and commissioning are essential for all drives. ABB-certified engineers provide professional installation and commissioning services for you to optimize drives safety, availability and performance. Our expertise also helps you minimize installation and commissioning time and cost.

### **Technical support & repairs**

Quick and accurate response during emergencies and efficient support during planned production breaks. Our drive repair services are fast and effective, helping you restore your operations quickly. ABB certified service engineers can provide both on-site repair and workshop repair services.

### **Spares & consumables**

If a fault is detected within a drive, the right, authentic ABB spare part can be delivered as soon as you need it.

### **Maintenance**

We offer maintenance services that cover everything from life cycle assessment through to detailed preventive maintenance programs. By performing regular maintenance, we can maximize your drives reliability and keep your drives going longer.

### **Engineering & consulting**

Engineering and consulting help in improving the performance of production processes and facilitates effective asset management. We leverage our network to provide the best solutions for you.

### **Upgrades & retrofits**

Enhance and modernize your existing drives with upgrades and retrofits from ABB. Upgrades and retrofits will improve your drives' reliability and performance and extend their functionality. In addition, modernizing your drives ensures support and spares availability. Modernization services are also available for drives other than ABB.

### **Advanced services**

Gain the unique ABB Ability™ digital advantage through data collection and analytics with advanced services. Our remote monitoring and energy efficiency solutions mean your business stays a step ahead. Accurate, real-time information about your energy consumption or drive events will facilitate you making the right decisions about your assets operations at the right time.

### **Replacements**

We offer you the world's widest drives portfolio. Our experts will help you select the optimal replacement drive with the correct features for your application.

### **End-of-life services**

We behave in an environmentally responsible way throughout every drive's life cycle, even when it reaches the end of its working life. We will remove and dispose of any ABB or non-ABB drive and associated equipment in line with the environmental regulations enforced within your country.
