ACS607 to ACS880U Module Upgrade

Sales release note

Modernization with module upgrade is now available for **ACS607 Single Drives (R7 to R9)**. This release allows customers now to upgrade their ACS600 Single Drives installed base with ACS880 technology

Target market group and benefits

Target group is ACS600 Single drives owners. ACS600 Single drives have been used in wide range of applications in several different industries, such as water & wastewater, chemical, oil & gas, power plants, pulp & paper, rubber etc.

By re-using the existing drive cabinet, cables, fuses and fuse switches the Module Upgrade service helps to keep the waste at minimum. Especially in cases, where physical access to drive is difficult, Module Upgrade allows customers to keep installation costs in control, being sometimes the only possible solution to modernize the existing installation.

Released types and voltages

Below table lists released type codes for corresponding ACS607 types

ACS600 type	ACS880U Module Upgrade type	Material Variant code
<i>400V</i>
